

Landscape Structures:

Countryside 2008, 2010 (still has some Columbia Cascade there- done in phases): looks good, about \$75K?

Lincoln Elliot 2008: low heights, lack of roofs makes it look unfinished

Park School, Brookline 2010 ?

Temple Beth Elohim, Wellesley 2010 ?

Sprague Elementary in Wellesley: colorful, large, rubberized surface \$\$\$

Warren Building in Wellesley (Washington St): well used, \$\$\$

Cabot: I think this is LS- relatively small structure but nice

Ultiplay:

Franklin 2009?: not too much decking, was a "sale" playground \$60K

Pierce: small in back \$20K, Columbia Cascade in front (sad)

Angier (left is 2005, right is 2008)

Mason-Rice: 2011 awesome, \$110K and they did a community build

Zervas (part of it)

Charlesbank ?

Older Columbia Cascade:

Burr (has added new components but older section is sad and needs repair)

Bowen (has a new separate piece from company from Canada- very bad experience, Columbia Cascade section looks good)

Williams (very sad)

Memorial-Spaulding (just re-sanded, but on actual sand footprint- yuck!)

Pierce (sad)

Underwood: I think this is Columbia Cascade

Other:

Ward: Henderson- very solid older wood structure

Horace Mann: a mix of Ultiplay and Henderson: well used
